SUBJECT INDEX

ACC (1-aminocyclopropane-1-carboxylic acid)
proline affects conversion of, to ethylene under salt and water stresses in the halophyte *Allenrolfea occidentalis* 359
Acid growth response capacity
of roots unaffected by 60-Hz electric field exposure sufficient to inhibit growth 395
Acid phosphatases, altered localization of
and ultrastructural changes in *Monoraphidium* and *Stichococcus* cells (Chlorophyceae) influenced by aluminum ... 457
Acid rain
effect of ozone and, on permeability of isolated cuticles to water and ions. Implication for forest decline phenomenon (French, English abstract) 215
Acidic fog
physiological responses of field-grown strawberry (*Fragaria* × *aranassa* Duch.) exposed to ambient ozone and ... 379
Acidic ions
seasonal deposition patterns of, and ammonium to the lichen *Ramalina menziesii* Tayl. in southern California 187
Activation, metabolic; of atrazine by maize
mutagenicity of atrazine in *Schizosaccharomyces pombe* Lindner with and without 237
Adventitious shoots
organogenesis leading to, and plants in excised shoot apices. Tissue culture investigations of bamboo—IV..... 307
Aged fennel seeds
analysis of germination curves of, by mathematical models 409
Al (see aluminum)
Allenrolfea occidentalis
proline affects ACC to ethylene conversion under salt and water stresses in the halophyte 359
Allium cepa
disturbances in cytokinesis caused by inorganic lead (in) 123
Aluminum
effect of, on growth of root tips of honey locust and loblolly pine 165
ultrastructural changes and altered localization of acid phosphatases in *Monoraphidium* and *Stichococcus* cells (Chlorophyceae) influenced by 457
Amino acid, free
changes in protein pattern and content of, in maize seedlings under water stress 357
Ammonium
seasonal deposition patterns of acidic ions and, to the lichen *Ramalina menziesii* Tayl. in southern California 187
Analysis, dynamic
of stomatal responses by an improved method of leaf heat balance 175
Analysis, genetic
of tropic responses 57
Analysis, germination curves
of aged fennel seeds by mathematical models 409
Analysis, growth components
in roots of wheat seedlings exposed to low O_2 concentrations 387
Analysis, spatio-temporal
of flower ontogenesis 111
Anatomical disturbances
in primary roots of *Zea mays* following periods of cool temperature 323
Architecture, cellular
specification of different types of, resulting from differential growth in root meristems..... 85
Atmospheric CO_2 enrichment
enhances survival of *Azolla* at high temperatures..... 337
Atrazine, mutagenicity of
in *Schizosaccharomyces pombe* Lindner with and without metabolic activation by maize 237
Auxin
phototropism involves a lateral gradient of growth inhibitors, not of; a review 25
Azolla
atmospheric CO_2 enrichment enhances survival of, at high temperatures 337
Bamboo
tissue culture investigations of,—IV. Organogenesis leading to adventitious shoots and plants in excised shoot apices 307
Bean leaves
nitrate reductase activity and nitrate content of; nitrogen dioxide and nitrate nutrition effects on..... 433
Beech forest, native herb layer of a
effects of open-top fumigations with SO_2, NO_2 and ozone on the 199

Biophysics
of differential growth 7
Cadmium toxicity
to plant callus culture *in vitro*—I. Modulation by zinc and dependence on plant species and callus line 301
California, southern
seasonal deposition patterns of acidic ions and ammonium to the lichen *Ramalina menziesii* Tayl. in 187
Callus culture
cadmium toxicity to *in vitro*,—I. Modulation by zinc and dependence on plant species and callus line 301
Carbohydrates, leaf
protein and ultrastructure of soybeans grown under CO_2 enrichment 141
Carbohydrates, non-structural
concentrations in leaves of "Valencia" orange subjected to water deficits 149
Carrot
growth response of, and radish to atmospheric CO_2 enrichment 135
Cell cycle regulators
the effect of, on protein profiles in cultured root meristems of *Pisum sativum* 317
Cellular architecture
specification of different types of, resulting from differential growth in root meristems 85
Chlorophyceae
ultrastructural changes and altered localization of acid phosphatases in *Monoraphidium* and *Stichococcus* cells ( ) influenced by aluminum 457
Citrus sinensis
non-structural carbohydrate concentrations in leaves of "Valencia" orange subjected to water deficits 149
CO_2 enrichment
leaf ultrastructure, carbohydrates and protein of soybeans grown under 141
CO_2 enrichment, atmospheric
enhances survival of *Azolla* at high temperatures 337
growth response of carrot and radish to 135
Colocasia esculenta var. *antiquorum*
organic and inorganic constituents of salt-tolerant ( ) tissues cultured in saline media 423
Computer simulation
differential growth and plant tropisms: a study assisted by 71
Control, transpirational
leaf temperature and, in cotton 487
Cotton, field-grown
response of soluble sugars and starch in, to ozone, water stress, and their combination 477
Cotton, leaf
temperature and transpirational control in 487
Cotton, leaf stomates
the occurrence of an internal cuticle in 229
Cultured root meristems
the effect of cell cycle regulators in protein profiles in, of *Pisum sativum* 317
Curving, of stems
on the, and twining 95
Cuticle, internal
the occurrence of an, in cotton (*Gossypium hirsutum* L.) leaf stomates 229
Cuticles, isolated; permeability of
to water and ions; effect of acid rain and ozone on. Implication for the forest decline phenomenon (French, English abstract) 215
Cytisus scoparius
an efficient method to overcome seed dormancy in Scotch broom ( ) 499
Cytokinesis
disturbances in, caused by inorganic lead 123
Cytological effects on plants
by an accidental leakage of methylisocyanate (MIC) gas 261
Daucus carota
growth response of carrot and radish to atmospheric CO_2 enrichment 135
Decline, forest
effect of acid rain and ozone on permeability of isolated cuticles to water and ions. Implications for the phenomenon of (French, English abstract) 215
Deposition patterns, seasonal
of acidic ions and ammonium to the lichen *Ramalina menziesii* Tayl. in southern California 187

Development, growth and
a spatio-temporal analysis of flower ontogenesis 111
Differential growth
biophysics of 7
Differential growth, and plant tropisms
a study assisted by computer simulation 71
Differential growth, in maize roots
hormone redistribution in gravireacting 37
Differential growth, in plant movements
unity or diversity of mechanisms? 47
Differential growth, in plants
a phenomenon that occurs at all levels of organization 1
Differential growth, in root meristems
resulting in specification of different types of cellular architecture 85
Dormancy, seed
an efficient method to overcome, in Scotch broom (*Cytisus scoparius*) 499
Dynamic analysis
of stomatal responses by an improved method of leaf heat balance 175
Electric field exposure, 60 Hz
root acid growth response capacity is unaffected by, sufficient to inhibit growth 395
Ethylene
proline affects conversion of ACC to, under salt and water stresses in the halophyte, *Allenrolfea occidentalis* 359
Excised root sections
of *Spartina alterniflora* Loisel. and *Limonium carolinianum* (Walt.) Britt.; effects of weathered fuel oil on solute leakage, respiration and plasmolysis in 249
Fennel seeds, aged
analysis of germination curves of, by mathematical models 409
Flagellates, photosynthetic and colorless
effects of solar u.v.-B irradiation on photomovement and mobility in 273
Flower, ontogenesis
on growth and development—a spatio-temporal analysis of 111
Fog, acidic
physiological responses of field-grown strawberry (*Fragaria* × *ananassa* Duch.) exposed to ambient ozone and... 379
Forest, beech; native herb layer of
effects of open-top fumigations with SO_2, NO_2, and ozone, on the 199
Forest decline phenomenon
effect of acid rain and ozone on permeability of isolated cuticles to water and ions. Implications for the (French, English abstract) 215
Fragaria × *ananassa* (Duch.)
physiological responses of field-grown strawberry, exposed to acidic fog and ambient ozone 379
Fuel oil, weathered
effect of, on solute leakage respiration and plasmolysis in excised root sections of *Spartina alterniflora* Loisel. and *Limonium carolinianum* (Walt.) Britt. 249
Fumigations, open-top
effect of, with SO_2, NO_2, and ozone on the native herb layer of a beech forest 199
Generation, rapid
and improvement of salt tolerance in photoperiod sensitive mangrove swamp rice varieties and breeding lines.. 417
Genetic analysis
of tropic responses 57
Germination
effects of selenium on, and radicle elongation in selected agronomic species 493
Germination curves, analysis of
of aged fennel seeds by mathematical models 409
Gleditsia triacanthos
effect of aluminum on growth of root tips of honey locust and loblolly pine 165
phytotoxicity of scandium in solution culture of loblolly pine (*Pinus taeda* L.) and honey locust (*Gleditsia triacanthos* L.) 155
Gossypium hirsutum
the occurrence of an internal cuticle in leaf stomates of, (cotton) 229
Glutamate oxalacetate transaminase
molecular forms and kinetic properties of malate dehydrogenase and, in Glenlea and Kharkov wheat cultivars 445

Glycine max
leaf ultrastructure, carbohydrates and protein of soybeans grown under CO_2 enrichment 141
Gradients, lateral, of growth inhibitors
involvement in phototropism. A review 25
Growth
of root tips of honey locust and loblolly pine; effect of aluminum on 165
Growth, and development
a spatio-temporal analysis of flower ontogenesis 111
Growth components, analysis of
in roots of wheat seedlings exposed to low O_2 concentrations 387
Growth, differential
the biophysics of 7
Growth, differential, and plant tropisms
a study assisted by computer simulation 71
Growth differential, in plant movements
unity or diversity of mechanisms? 47
Growth, differential, in plants
a phenomenon that occurs at all levels of organization 1
Growth, differential, in root meristems
resulting in the specification of different types of cellular architecture 85
Growth, differential, maize roots
and hormone redistribution in gravireacting 37
Growth, inhibition of
root acid growth response capacity is unaffected by 60-Hz electric field exposure sufficient for the 395
Growth inhibitors, lateral gradients of
involvement of, in phototropism. A review 25
Growth of lentil radicles
under water and temperature stress 343
Growth, pollen tubes
influence of triethyllead on, and ultrastructure of 283
Growth response
of carrot and radish to atmospheric CO_2 enrichment 135
Growth response capacity, acid
of roots is unaffected by 60-Hz electric field exposure sufficient to inhibit growth 395
Halophyte
proline affects ACC to ethylene conversion under salt and water stress in the, *Allenrolfea occidentalis* 359
Heat balance, leaf
dynamic analysis of stomatal responses by an improved method of 175
Herb layer, native, of a beech forest
effects of open-top fumigations with SO_2, NO_2, and ozone on the 199
Holly leaves
effect of acid rain and ozone on permeability of cuticles isolated from, to water and ions. Implication for the forest decline phenomenon (French, English abstract) 215
Honey locust
effect of aluminum on growth of root tips of loblolly pine and 165
phytotoxicity of scandium in solution culture of loblolly pine (*Pinus taeda* L.) and, (*Gleditsia triacanthos* L.) 155
Hormone redistribution
differential growth and, in gravireacting maize roots 37
Idaho, southwestern
root profiles of some native and exotic plant species in 241
Ilex aquifolium
effect of acid rain and ozone on permeability of cuticles isolated from leaves of, to water and ions. Implications for the forest decline phenomenon (French, English abstract) 215
Inhibitors, growth
phototropism involves a lateral gradient of, not of auxin. A review 25
Inorganic constituents
and organic constituents of salt tolerant taro (*Colocasia esculenta* var. *antiquorum*) tissues cultured in saline media. 423
Inorganic lead
disturbances in cytokinesis caused by 123
Internal cuticle
the occurrence of an, in cotton (*Gossypium hirsutum* L.) leaf stomates 229

Ions, acidic
seasonal deposition patterns of, and ammonium to the lichen *Ramalina menziesii* Tayl. in southern California 187
Ions, permeability of isolated cuticles to
and water; effect of acid rain and ozone on. Implications for the forest decline phenomenon
(French, English abstract) 215
Ipomoea biloba
uptake of titanium and iron by, from titaniferrous sands 293
Irradiation, solar u.v.-B
effects of, on photomovement and motility in photosynthetic and colorless flagellates 273
Iron
uptake of titanium and, by *Ipomoea biloba* from titaniferrous sands 293
Isolated cuticles, permeability of
to water and ions; effect of acid rain and ozone on. Implication for the forest decline phenomenon
(French, English abstract) 215
Kinetic properties
and molecular forms of malate dehydrogenase and glutamate oxalacetate transaminase in Glenlea and
Kharkov wheat cultivars..... 445
Lead, inorganic
disturbances in cytokinesis caused by 123
Leaf carbohydrates
ultrastructure and protein in soybeans grown under CO_2 enrichment 141
Leaf, cotton; stomates of
the occurrence of an internal cuticle in 229
Leaf heat balance
dynamic analysis of stomatal responses by an improved method of 175
Leaf protein
carbohydrates and ultrastructure of soybeans grown under CO_2 enrichment 141
Leaf stomates
the occurrence of an internal cuticle in, of cotton (*Gossypium hirsutum* L.) 229
Leaf temperature
and transpirational control in cotton 487
Leaf ultrastructure
carbohydrates and protein of soybeans grown under CO_2 enrichment..... 141
Leakage, accidental; of methylisocyanate gas
cytological effects on plants of an 261
Lentil radicles,
growth of, under water and temperature stress 343
Leaves, bean
nitrogen dioxide and nitrate nutrition effects on nitrate reductase activity and nitrate content of..... 433
Leaves, holly
effect of acid rain and ozone on permeability of cuticles isolated from, to water and ions. Implication for the
forest decline phenomenon (French, English abstract)..... 215
Leaves, of nitrate reductase-deficient barley mutants
NO_2 flux into, and corresponding changes in nitrate activity..... 439
Leaves, of "Valencia" orange
non-structural carbohydrate concentrations in, subjected to water deficits 149
Leaves, tobacco
pathogenic and non-pathogenic stress effects on peroxidases in 365
Lichen
seasonal deposition patterns of acidic ions and ammonium to the, *Ramalina menziesii* Tayl. in southern California 187
Limonium carolinianum (Walt.) Britt.
effects of weathered fuel oil on solute leakage, respiration and plasmolysis in excised root sections of *Spartina alterniflora* Loisel. and 249
Loblolly pine
effect of aluminum on growth of root tips of honey locust and 165
phytotoxicity of scandium in solution culture of loblolly pine (*Pinus taeda* L.) and honey locust
(*Gleditsia triacanthos* L.) 155
Lycopersicon esculentum
somaclonal and radiation induced variation in 401
Maize, metabolic activation of atrazine by
mutagenicity of atrazine in *Schizosaccharomyces pombe* Lindner with and without 237

Maize roots, gravireacting
differential growth and hormone redistribution in 37
Maize seedlings
changes in free amino acid content and protein pattern of, under water stress 351
Malate dehydrogenase
and glutamate oxalacetate transaminase in Glenlea and Kharkov wheat cultivars; molecular forms and kinetic properties of 445
Mathematical models
analysis of germination curves of aged fennel seeds by 409
Mechanisms, of plant movements
caused by differential growth—unity or diversity of, ? 47
Meristems, cultured
the effect of cell cycle regulators on protein profiles in, of *Pisum sativum* roots 317
Meristems, root, cellular architecture in
differential growth resulting in the specification of different types of 85
Metabolic activation of atrazine by maize
mutagenicity of atrazine in *Schizosaccharomyces pombe* Lindner with and without 237
Method, efficient, to overcome seed dormancy
an, in Scotch broom (*Cytisus scoparius*) 499
Method, improved; of leaf heat balance
dynamic analysis of stomatal responses by an 175
Methylisocyanate (MIC) gas
cytological effects on plants by an accidental leakage of..... 261
Molecular forms
and kinetic properties of malate dehydrogenase and glutamate oxalacetate transaminase in Glenlea and Kharkov wheat cultivars..... 445
Monoraphidium sp.
ultrastructural changes and altered localization of acid phosphatases in, and *Stichococcus* cells (Chlorophyceae) influenced by aluminum 457
Motility in photosynthetic and colorless flagellates
effects of solar u.v.-B. irradiation on photomovement and 273
Movements, plant
caused by differential growth—unity or diversity of mechanisms? 47
Mutagenicity of atrazine
in *Schizosaccharomyces pombe* Lindner with and without metabolic activation by maize 237
Nitrate content, of bean leaves
nitrogen dioxide and nitrate nutrition effects on nitrogen reductase activity and..... 433
Nitrate nutrition effects
nitrogen dioxide and, on nitrate reductase activity and nitrate content of bean leaves 433
Nitrate reductase activity (barley leaves)
NO_2 flux into leaves of nitrate-reductase-deficient barley mutants and corresponding changes in 439
Nitrate reductase activity (bean leaves)
and nitrate content of bean leaves; nitrogen dioxide and nitrate nutrition effects on..... 433
Nitrogen dioxide
and nitrate nutrition effects on nitrate reductase activity and nitrate content of bean leaves 433
Non-pathogenic
and pathogenic stress effects on peroxidases in leaves of tobacco 365
Non-structural carbohydrate
concentration in leaves of "Valencia" orange subjected to water deficits 149
NO_2
effects of open-top fumigations with SO_2, ozone, and, on the native herb layer of a beech forest..... 199
NO_2 flux
into leaves of nitrate reductase-deficient barley mutants and corresponding changes in nitrate reductase activity 439
O_2 concentrations
analysis of growth components in roots of, wheat seedlings exposed to low 387
Ontogenesis, flower
on growth and development—a spatio-temporal analysis of 111
Open-top fumigations
effects of, with SO_2, NO_2 and ozone on the native herb layer of a beech forest 199
Orange "Valencia"; leaves of
non-structural carbohydrate concentrations in, subjected to water deficits 149

Organic constituents
and inorganic constituents of salt-tolerant taro (*Colocasia esculenta* var. *antiquorum*) tissues cultured in saline media 423
Organization, levels of
differential growth in plants, a phenomenon that occurs at all levels of 1
Organogenesis
leading to adventitious shoots and plants in excised shoot apices. Tissue culture investigations of bamboo—IV. 307
Ozone
effect of acid rain and, on permeability of isolated cuticles to water and ions. Implication for the forest decline phenomenon (French, English abstract) 215
effects of open-top fumigations with SO_2, NO_2, and , on native herb layer of a beech forest 199
response of soluble sugars and starch in field-grown cotton to , water stress, and their combination 477
Ozone, ambient
physiological responses of field-grown strawberry (*Fragaria* × *ananassa* Duch.) exposed to acidic fog and 379
Pathogenic
and non-pathogenic effects on peroxidases in leaves of tobacco 365
Pb
see: lead, inorganic
Permeability of isolated cuticles
to water and ions; effect of acid rain and ozone on. Implication for the forest decline phenomenon (French, English abstract) 215
Peroxidases
pathogenic and non-pathogenic stress effects on, in leaves of tobacco 365
Photomovement in photosynthetic and colorless flagellates
effects of solar u.v.-B irradiation on motility and 273
Photoperiod sensitive mangrove swamp rice
rapid generation and improvement of salt tolerance in varieties and breeding lines of 417
Phytotoxicity
of scandium in solution culture of loblolly pine (*Pinus taeda* L.) and honey locust (*Gleditsia triacanthos* L.) 155
Phototropism
involves a lateral gradient of growth inhibitors, not of auxin. A review 25
Physiological responses
of field-grown strawberry (*Fragaria* × *ananassa* Duch.) exposed to acidic fog and ambient ozone 379
Pisum sativum
the effect of cell cycle regulators on protein profiles in cultured root meristems of 317
Pinus taeda
effect of aluminum on growth of root tips of honey locust and loblolly pine 165
phytotoxicity of scandium in solution culture of loblolly pine and honey locust (*Gleditsia triacanthos* L.) 155
Plant movements
caused by differential growth—unity or diversity of mechanisms? 47
Plant tropisms
differential growth and ,: a study assisted by computer simulation 71
Plasmolysis
effects of weathered fuel oil on solute leakage, respiration, and ; in excised root sections of *Spartina alterniflora* Loisel. and *Limonium carolinianum* (Walt.) Britt 249
Pollen tube, tobacco
influence of triethyllead on growth and ultrastructure of 283
Profiles, root
of some native and exotic plant species in southeastern Idaho 241
Proline
affects ACC to ethylene conversion under salt and water stresses in the halophyte *Allenrolfea occidentalis* 359
Protein
, carbohydrates, and ultrastructure of soybeans grown under CO_2 enrichment 141
Protein pattern
changes in free amino acid content and , of maize seedlings under water stress 351
Protein profiles
the effect of cell cycle regulators on, in cultured root meristems of *Pisum sativum* 317
Radiation-induced variation
somaclonal and, in *Lycopersicon esculentum* 401
Radicle elongation
effects of selenium on germination and , of selected agronomic species 493
Radish
growth response of carrot and , to atmospheric CO_2 enrichment 135

Rain, acid
effect of ozone and , on permeability of isolated cuticles to water and ions. Implication for forest decline phenomenon (French, English abstract) 215
Ramalina menziesii
seasonal deposition patterns of acidic ions and ammonium to the lichen, in southern California 187
Raphanus sativa
growth response of carrot and radish to atmospheric CO_2 enrichment..... 135
Respiration
effects of weathered fuel oil on solute leakage, plasmolysis, and ; in excised root sections of *Spartina alterniflora* Loisel. and *Limonium carolinianum* (Walt.) Britt. 249
Responses, physiological
of field-grown strawberry (*Fragaria* × *ananassa* Duch.) exposed to acidic fog and ambient ozone 379
Responses, tropic
the genetic analysis of..... 57
Rice
rapid generation and improvement of salt tolerance in photoperiod sensitive mangrove swamp varieties and breeding lines of 417
Root, acid growth response capacity
is unaffected by 60-Hz electric field exposure sufficient to inhibit growth..... 395
Root meristems, cellular architecture in
differential growth resulting in the specification of different types of 85
Root profiles
of some native and exotic plant species in southeastern Idaho 241
Root sections, excised
of *Spartina alterniflora* Loisel. and *Limonium carolinianum* (Walt.) Britt.; effects of weathered fuel oil on solute leakage, respiration and plasmolysis in 249
Root tips
of honey locust and loblolly pine, effect of aluminum on growth of 165
Roots, maize
differential growth and hormone redistribution in gravireacting 37
, of wheat seedlings
analysis of growth components in, exposed to low O_2 concentrations 387
, primary
of *Zea mays;* anatomical disturbances in, following periods of cool temperature 323
Rubia peregrina L.
a stress resistant weed..... 467
Salt tolerance
rapid generation and improvement of, in photoperiod sensitive mangrove swamp rice varieties and breeding lines 417
Salt tolerant
taro (*Colocasia esculenta* var. *antiquorum*) tissues cultured in saline media. Organic and inorganic constituents of .. 423
Salt stress
proline affects ACC to ethylene conversion under water stress and, in the halophyte *Allenrolfea occidentalis* 359
Scandium
phytotoxicity of, in solution culture of loblolly pine (*Pinus taeda* L.) and honey locust (*Gleditsia triacanthos* L.) 155
Schizosaccharomyces pombe
mutagenicity of atrazine in, with and without metabolic activation by maize 237
Scotch broom
an efficient method to overcome seed dormancy in , (*Cytisus scoparius*) 499
Seasonal deposition patterns
of acid ions and ammonium to the lichen *Ramalina menziesii* Tayl. in southern California 187
Seed dormancy
an efficient method to overcome, in Scotch broom (*Cytisus scoparius*) 499
Selenium, effects of
on germination and radicle elongation of selected agronomic species..... 493
Seedlings, maize
changes in free amino acid content and protein pattern in, under water stress..... 351
Shoot apices, excised
tissue culture investigations of bamboo—IV. Organogenesis leading to adventitious shoots and plants in 307
Simulation, computer
differential growth and plant tropisms: a study assisted by..... 71

SO_2
effects of open-top fumigations with, NO_2 and ozone on the native herb layer of a beech forest 199
Solar u.v.-B irradiation
effects of, on photomovement and motility in photosynthetic and colorless flagellates 273
Soluble sugars
response of, and of starch in field-grown cotton to ozone, water stress, and their combination 477
Solute leakage
effects of weathered fuel oil on respiration, plasmolysis, and ; in excised root sections of *Spartina alterniflora* Loisel. and *Limonium carolinianum* (Walt.) Britt. 249
Solution culture
phytotoxicity of scandium in , of loblolly pine (*Pinus taeda* L.) and honey locust (*Gleditsia triacanthos* L.) 155
Somaclonal variation
and radiation-induced variation in *Lycopersicon esculentum* 401
Southeastern Idaho
root profiles of some native and exotic plant species in 241
Southern California
seasonal patterns of acidic ions and ammonium to the lichen *Ramalina menziesii* Tayl. in 187
Soybeans
leaf ultrastructure, carbohydrate and protein of , grown under CO_2 enrichment 141
Spartina alterniflora Loisel.
effects of weathered fuel oil on solute leakage, respiration and plasmolysis in excised root sections of *Limonium carolinianum* (Walt.) Britt. and 249
Spatio-temporal analysis
of flower ontogenesis 111
Starch
response of soluble sugars and, in field-grown cotton to ozone, water stress, and their combination 477
Stems
curving and twining of..... 95
Stichococcus sp.
ultrastructural changes and altered localization of acid phosphatases in cells of *Monoraphidium* and (Chlorophyceae) influenced by aluminum..... 457
Stomatal responses
dynamic analysis of, by an improved method of leaf heat transfer..... 379
Stomates, leaf
the occurrence of an internal cuticle in, of cotton (*Gossypium hirsutum* L.) 229
Strawberry (*Fragaria* × *ananassa* Duch.)
physiological responses of field-grown, exposed to acidic fog and ambient ozone 379
Survival, enhancement of
in *Azolla* at high temperatures, by atmospheric CO_2 enrichment 337
Taro (*Colocasia esculenta* var. *antiquorum*)
tissues cultured in saline media; organic and inorganic constituents of..... 423
Temperature, cool
anatomical disturbances in primary roots of *Zea mays* following periods of 323
Temperature, leaf
and transpirational control in cotton 487
Temperature stress
growth of lentil radicles under water and..... 343
Temperature, high
atmospheric CO_2 enrichment enhances survival of *Azolla* at 337
Tissue culture
investigations of bamboo—IV. Organogenesis leading to adventitious shoots and plants in excised shoot apices 307
Titaniferrous sands
uptake of titanium and iron by *Ipomoea biloba* from 293
Titanium
uptake of iron and, by *Ipomoea biloba* from titaniferrous sands 293
Tobacco leaves
pathogenic and non-pathogenic stress effects on peroxidases in 365
Tobacco pollen tubes
influence of triethyllead on growth and ultrastructure by 283
Toxicity, cadmium
to plant callus culture *in vitro*. Modulation by zinc and dependence on plant species and callus line 301
Transpirational control
leaf temperature and, in cotton 487

Triethyllead
influence of, on growth and ultrastructure of tobacco pollen tubes 283
Tropic responses
the genetic analysis of..... 57
Tropisms, plant,
differential growth and, : a study assisted by computer simulation 71
Twining, of stems
on the curving and..... 95
Ultrastructural changes
and altered localization of acid phosphatases in *Monoraphidium* and *Stichococcus* cells (Chlorophyceae) influenced by aluminum 457
Ultrastructure
and growth of tobacco pollen tubes, influence of triethyllead on 283
Ultrastructure, leaf
carbohydrates and protein of soybeans grown under CO_2 enrichment..... 141
Uptake
of titanium and iron by *Ipomoea biloba* from titaniferrous sands..... 293
Water deficits
non-structural carbohydrate concentrations in leaves of "Valencia" orange subjected to 149
Water, permeability of isolated cuticles to
and ions; effect of acid rain and ozone on. Implication for forest decline phenomenon (French, English abstract) 215
Water stress
changes in free amino acid content and protein pattern in maize seedlings under..... 351
growth of lentil radicles under temperature and 343
proline affects ACC to ethylene conversion under salt stress and, in the halophyte *Allenrolfea occidentalis*..... 359
response of soluble sugars and starch in field-grown cotton to ozone, , and their combination..... 477
Weathered fuel oil
effect of , on solute leakage, respiration and plasmolysis in excised root sections of *Spartina alterniflora* Loisel. and *Limonium carolinianum* (Walt.) Britt. 249
Weed
Rubia peregrina L.: a stress resistant 467
Wheat seedlings
analysis of growth components in roots of, exposed to low CO_2 concentrations..... 387
Zea mays
anatomical disturbances in primary roots of, following periods of cool temperature 323
Zinc
modulation of cadmium toxicity by, in plant callus culture *in vitro* 301
